

COURSE PROFILE

Course Name	Code	Semester	Term	Theory +PS+Lab. (hour/week)	Local Credits	ECTS
Functional Analysis	MATH 314	Spring	6	3+0+0	3	8

Prerequisites	None
----------------------	------

Course Language	English
Course Type	Elective
Course Lecturer	
Course Assistant	
Course Objectives	The aim of the course is to introduce students to the elements of introductory Functional Analysis, metric and normed spaces, completeness and Banach spaces, inner product and Hilbert spaces and to introduce bounded linear operators.
Course Learning Outcomes	By the end of the course the students should be able to: <ol style="list-style-type: none"> 1. to recognize metric spaces and normed spaces, understand the difference between the structure of fundamental function spaces, and handle a variety of metric and norm properties 2. to prove elementary theorems involving the concepts of function spaces
Course Content	Elementary concepts. Metric spaces. Normed spaces. Banach spaces. Inner product, Orthogonality. Continuous linear transformations. The space of bounded linear operators.

COURSE CONTENT

Week	Subjects	Related Preparation
1	Linear Algebra	Chapter 1
2	Metric spaces	Chapter 1
3	Lebesgue Integration	Chapter 1
4	Example of Normed Spaces	Chapter 2
5	Finite-dimensional Normed Spaces	Chapter 2

6	Banach Spaces	Chapter 2
7	Inner Products	Chapter 3
8	Orthogonality, Orthogonal Complements	Chapter 3
9	Orthonormal Bases in Infinite Dimensions	Chapter 3
10	Fourier Series	Chapter 3
11	Continuous Linear Transformations	Chapter 4
12	The Norm of a Bounded Linear Operator	Chapter 4
13	The Space $B(X,Y)$	Chapter 4
14	Inverses of Operators	Chapter 4

Course Textbooks	Bryan P. Rynne and Martin A. Youngson: Linear Functional Analysis, second edition, Springer.
Recommended References	I.J. Maddox, Elements of Functional Analysis, second edition, Cambridge. Peter D. Lax, Functional Analysis, Wiley.

Semester Requirements	Number	Percentage of Grade
Attendance/Participation	1	5
Laboratory	-	-
Application	-	-
Special Course Internship (Work Placement)	-	-
Quizzes/Studio Critics	-	-
Homework Assignments	13	-
Presentation	-	-
Project	-	-
Seminar/Workshop	-	-
Midterms/Oral Exams	2	60

Final/Resit Exam	1	35
Total	17	100

PERCENTAGE OF SEMESTER WORK	16	65
PERCENTAGE OF FINAL WORK	1	35
Total	17	100

COURSE'S CONTRIBUTION TO PROGRAM

#	Program Qualifications / Outcomes	* Level of Contribution				
		1	2	3	4	5
1	To have a grasp of basic mathematics, applied mathematics and theories and applications of statistics.				X	
2	To be able to use theoretical and applied knowledge acquired in the advanced fields of mathematics and statistics,					X
3	To be able to define and analyze problems and to find solutions based on scientific methods,					X
4	To be able to apply mathematics and statistics in real life with interdisciplinary approach and to discover their potentials,					X
5	To be able to acquire necessary information and to make modeling in any field that mathematics is used and to improve herself/himself,					X
6	To be able to criticize and renew her/his own models and solutions,					X
7	To be able to tell theoretical and technical information easily to both experts in detail and nonexperts in basic and comprehensible way,				X	
8	To be able to use international resources in English and in a second foreign language from the European Language Portfolio (at the level of B1) effectively and to keep knowledge up-to-date, to communicate comfortably with colleagues from Turkey and other countries, to				X	

	follow periodic literature,					
9	To be familiar with computer programs used in the fields of mathematics and statistics and to be able to use at least one of them effectively at the European Computer Driving Licence Advanced Level,		X			
10	To be able to behave in accordance with social, scientific and ethical values in each step of the projects involved and to be able to introduce and apply projects in terms of civic engagement,				X	
11	To be able to evaluate all processes effectively and to have enough awareness about quality management by being conscious and having intellectual background in the universal sense,				X	
12	By having a way of abstract thinking, to be able to connect concrete events and to transfer solutions, to be able to design experiments, collect data, and analyze results by scientific methods and to interfere,					X
13	To be able to continue lifelong learning by renewing the knowledge, the abilities and the competencies which have been developed during the program, and being conscious about lifelong learning,				X	
14	To be able to adapt and transfer the knowledge gained in the areas of mathematics and statistics to the level of secondary school,				X	
15	To be able to conduct a research either as an individual or as a team member, and to be effective in each related step of the project, to take role in the decision process, to plan and manage the project by using time effectively.				X	

*1 Lowest, 2 Low, 3 Average, 4 High, 5 Highest

ECTS ALLOCATED BASED ON STUDENT WORKLOAD BY THE COURSE DESCRIPTION
