COURSE PROFILE

| Course Name | Code | Semester | Term | Theory +PS+Lab. <br> (hour/week) | Local Credits | ECTS |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Mathematics I | MATH $103$ | Fall | 1 | $(3+0+0)$ | 3 | 5 |

| Prerequisites | None |
| :--- | :--- |

| Course Language | English |
| :---: | :---: |
| Course Type | Required |
| Course Lecturer | - Assist.Prof. Melike Aydoğan |
| Course Assistant | - None |
| Course Objectives | To understand the basic methodologies and principles of elementary calculus and see how it is used in the solution of realistic problems. |
| Course Learning Outcomes | By the end of the course the students should be able to: <br> 1. prepared for Mathematics II and calculus-based subjects in social sciences, <br> 2. have a knowledge of the fundamental definitions and theorems of elementary calculus, <br> 3. complete routine derivations associated with calculus, recognize elementary applications of differential calculus, and be literate in the language and notation of calculus, <br> 4. demonstrate knowledge of mathematics to construct, analyze and interpret mathematical models, <br> 5. have the skills of appropriate level for modeling and solving complicated mathematical problems arising in various social sciences as well as in economics, business and psychology. |
| Course Content | Sets of real numbers, functions, special functions. <br> Symmetry, translations and reflections. Lines. Exponential functions, logarithmic functions, properties of logarithms. Continuity. The derivative., Rules for differentiation, Derivatives of logarithmic functions. Derivatives of exponential function., Absolute extrema on a closed interval, Concavity. |

COURSE CONTENT

| Week | Subjects | Related <br> Preparation |
| :---: | :--- | :--- |
| 1 | Sets of real numbers. Functions, Special functions. | $0.1,2.1$, <br> 2.2 |

| 2 | Combinations of functions. Inverse functions. Graphs in rectangular coordinates. | $\begin{aligned} & 2.3,2.4, \\ & 2.5 \end{aligned}$ |
| :---: | :---: | :---: |
| 3 | Symmetry, translations and reflections. Lines. | $\begin{aligned} & 2.6,2.7, \\ & 3.1 \end{aligned}$ |
| 4 | Lines. Quadratic functions. | 3.1, 3.3 |
| 5 | Systems of linear equations, Nonlinear systems. | 3.4, 3.5 |
| 6 | Exponential functions. Logarithmic functions. Properties of logarithms. | $\begin{aligned} & 4.1,4.2, \\ & 4.3 \end{aligned}$ |
| 7 | Logarithmic and exponential equations. Limits. | $\begin{aligned} & 4.4,10.1, \\ & 10.2 \end{aligned}$ |
| 8 | Continuity. The derivative. | 10.3, 11.1 |
| 9 | Rules for differentiation. Product and quotient rules. The chain rule. | $\begin{aligned} & 11.2,11.4, \\ & 11.5 \end{aligned}$ |
| 10 | Derivatives of logarithmic functions. Derivatives of exponential functions. | 12.1, 12.2 |
| 11 | Implicit differentiation. Logarithmic differentiation | 12.4, 12.5 |
| 12 | Higher-order derivatives. Relative extrema | 12.7, 13.1 |
| 13 | Absolute extrema on a closed interval. Concavity. | 13.2, 13.3 |

The second derivative test. Asymptotes. Applied maxima

| Course Textbooks | Introductory Mathematical Analysis (for Business, Economics, and the Life and Social <br> Sciences), 13th Edition, by Ernest F. Haeussler, Jr., Richard S. Paul and Richard J. Wood, <br> Prentice Hall 2011. |

## COURSE'S CONTRIBUTION TO PROGRAM

| \# | Program Qualifications / Outcomes | * Level of Contribution |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1 | 2 | 3 | 4 | 5 |
| 1 | To have a grasp of basic mathematics, applied mathematics and theories and applications of statistics. |  |  |  |  | X |
| 2 | To be able to use theoretical and applied knowledge acquired in the advanced fields of mathematics and statistics, |  |  |  |  | X |
| 3 | To be able to define and analyze problems and to find solutions based on scientific methods, |  |  |  |  | X |
| 4 | To be able to apply mathematics and statistics in real life with interdisciplinary approach and to discover their potentials, |  |  |  | X |  |
| 5 | To be able to acquire necessary information and to make modeling in any field that mathematics is used and to improve herself/himself, |  |  |  | X |  |
| 6 | To be able to criticize and renew her/his own models and solutions, |  |  |  |  | X |
| 7 | To be able to tell theoretical and technical information easily to both experts in detail and nonexperts in basic and comprehensible way, |  |  |  | X |  |
| 8 | To be able to use international resources in English and in a second foreign language from the European Language Portfolio (at the level of B1) effectively and to keep knowledge up-to-date, to communicate comfortably with colleagues from Turkey and other countries, to follow periodic literature, |  |  |  |  | X |
| 9 | To be familiar with computer programs used in the fields of mathematics and statistics and to be able to use at least one of them effectively at the European Computer Driving Licence Advanced Level, |  |  |  |  | X |
| 10 | To be able to behave in accordance with social, scientific and ethical values in each step of the projects involved and to be able to introduce and apply projects in terms of civic engagement, |  |  |  | X |  |
| 11 | To be able to evaluate all processes effectively and to have enough awareness about |  |  |  | X |  |

|  | quality management by being conscious and having intellectual background in the universal sense, |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 12 | By having a way of abstract thinking, to be able to connect concrete events and to transfer solutions, to be able to design experiments, collect data, and analyze results by scientific methods and to interfere, |  |  |  |  | X |
| 13 | To be able to continue lifelong learning by renewing the knowledge, the abilities and the compentencies which have been developed during the program, and being conscious about lifelong learning, |  |  | X |  |  |
| 14 | To be able to adapt and transfer the knowledge gained in the areas of mathematics and statistics to the level of secondary school, |  |  |  | X |  |
| 15 | To be able to conduct a research either as an individual or as a team member, and to be effective in each related step of the project, to take role in the decision process, to plan and manage the project by using time effectively. |  |  |  |  | X |

*1 Lowest, 2 Low, 3 Average, 4 High, 5 Highest

ECTS ALLOCATED BASED ON STUDENT WORKLOAD BY THE COURSE DESCRIPTION

| Activities | Number | Duration (Hours) | Total Workload |
