

**Işık University**  
**Faculty of Arts and Sciences**  
**Department of Physics**

**PHYS 141 – Science and Nature I**

**COURSE SYLLABUS**

| Course Name          | Code     | Semester | Theory (hour/week) | Application (hour/week) | Laboratory (hour/week) | Local Credits | ECTS |
|----------------------|----------|----------|--------------------|-------------------------|------------------------|---------------|------|
| Science and Nature I | PHYS 141 | Fall     | 3                  | 0                       | 0                      | 3             | 5    |

|                      |      |
|----------------------|------|
| <b>Prerequisites</b> | None |
|----------------------|------|

|                                 |   |
|---------------------------------|---|
| <b>Course Language</b>          | English   |
| <b>Course Type</b>              | Elective  |
| <b>Course Level</b>             | First Cycle   |
| <b>Course Coordinator</b>       | -   |
| <b>Course Lecturer(s)</b>       | -   |
| <b>Course Assistants</b>        | -   |
| <b>Course Objectives</b>        | <p>This course is designed for science non-majors students to give a multidisciplinary understanding of science and nature. By the end of the course, students should</p> <ul style="list-style-type: none"> <li>• Understand basic concepts of our knowledge of nature</li> <li>• Learn the method of scientific thinking</li> <li>• Formulate questions and hypotheses relating to scientific</li> </ul>  |
| <b>Course Learning Outcomes</b> | <p>On successful completion of this course students will be able to</p> <ol style="list-style-type: none"> <li>1. Apply analytical and critical thinking skills to contemporary global issues</li> <li>2. Describe the interrelationships between science, technology, and society</li> <li>3. Develop an understanding in global issues in science and the society it affects</li> <li>4. Demonstrate an ability to function on teams</li> <li>5. Improve students' oral and written communication skills</li> </ol> |
| <b>Course Content</b>           | <p>Introduction of some of the basic concepts of our knowledge of nature; natural laws in their interconnectivity; the way science operates, the method of scientific thinking; global issues in science; origins of life proved through scientific evidence; probing a scientific question in practice. The answers that we have -or don't have as yet.</p>  |

## WEEKLY SUBJECTS AND RELATED PREPARATION STUDIES

| Week | Subject  |
|------|--|
| 1    | Introduction to what science is and how it works |
| 2    | Historical background of scientific methods      |
| 3    | Experimental design                              |
| 4    | Hypothesis driven science                        |
| 5    | Great themes of natural science                  |
| 6    | Ethics and science                               |
| 7    | Review on scientific methodology                 |
| 8    | Atoms and chemistry                              |
| 9    | Origins of life                                  |
| 10   | Genetics and evolution                           |
| 11   | Science and society                              |
| 12   | Pseudoscience                                    |
| 13   | Review on science and global issues              |
| 14   | Energy concepts                                  |
| 15   | Critical scientific thinking                     |

## TEXTBOOKS

|                             |   |
|-----------------------------|---|
| <b>Required Textbook(s)</b> | James Trefil, Robert M. Hazen<br>The Sciences: An Integrated Approach<br>Wiley 5 <sup>th</sup> Edition, 2007  |
| <b>Recommended Readings</b> | <ul style="list-style-type: none"><li>• Peter Kosso. The book of nature: an introduction to the philosophy of science, Cambridge University Press, Cambridge, 1992.</li><li>• Per Bak. How nature works. Springer, New York, 1996</li></ul> |

## EVALUATION SYSTEM

| <b>Semester Requirements</b>               | <b>Number</b> | <b>Percentage of Grade</b> |
|--|---------------|----------------------------|
| Attendance/Participation                   | -             | -                          |
| Laboratory                                 | -             | -                          |
| Application                                | -             | -                          |
| Field Work                                 | -             | -                          |
| Special Course Internship (Work Placement) | -             | -                          |
| Quizzes/Studio Critics                     | 3             | 6                          |
| Homework Assignments                       | 10            | 16                         |
| Presentation/Jury                          | -             | -                          |
| Project                                    | -             | -                          |
| Seminar/Workshop                           | -             | -                          |
| Midterms/Oral Exams                        | 2             | 52                         |
| Final/Oral Exam                            | 1             | 26                         |
| <b>Total</b>                               | <b>16</b>     | <b>100</b>                 |

|                             |           |            |
|-----------------------------|-----------|------------|
| Percentage of Semester Work | 15        | 74         |
| Percentage of Final Work    | 1         | 26         |
| <b>Total</b>                | <b>16</b> | <b>100</b> |

## THE RELATIONSHIP BETWEEN COURSE LEARNING OUTCOMES AND PROGRAM OUTCOMES

| Number | Program Outcomes  | Level of Contribution* |   |   |   |   |
|--------|---|------------------------|---|---|---|---|
|        |   | 1                      | 2 | 3 | 4 | 5 |
| 1      | To have a comprehension of the core areas of physics, including classical and quantum mechanics, electromagnetism, statistical and thermal physics.   | X                      |   |   |   |   |
| 2      | To have a comprehension of basic mathematics, including differential and integral calculus, linear algebra, differential equations and complex analysis.  |                        |   |   |   |   |
| 3      | To have a comprehension of computer programming and chemistry.  | X                      |   |   |   |   |
| 4      | To have a comprehension of the importance and practice of good ethical standards.   |                        |   | X |   |   |
| 5      | To have a recognition of contemporary issues in science and its applications.   |                        |   |   |   | X |
| 6      | To have an ability to construct theoretical models, solve problems, design and conduct experiments, as well as to analyze and interpret data.   |                        |   | X |   |   |
| 7      | To have an ability to demonstrate their understanding of at least one advanced topic in theoretical or experimental physics.  |                        |   |   |   |   |
| 8      | To have an ability to function on multi-disciplinary teams  |                        |   | X |   |   |
| 9      | To have an ability to effectively communicate information in both written and verbal form   |                        | X |   |   |   |
| 10     | To have a recognition of the need for and an ability to engage in life-long learning.   |                        |   |   | X |   |
| 11     | To have an ability to use modern physics techniques, skills, and computing tools necessary for physics practice ( use laboratory and workshop equipment to generate data, prepare technical drawings, prepare technical reports, give technical presentations, take notes effectively, write computer programs, use mathematics and/or computational tools and packages to make models) . |                        |   |   |   |   |

\*1 Lowest, 2 Low, 3 Average, 4 High, 5 Highest

|   |  |
|---|--|
| <b>Contribution of Course Learning Outcomes to Program Outcomes</b> | The class contributes to the student development in terms of building a foundation for science and scientific methodology for further study. Students should develop problem solving abilities and enhance critical thinking and improve their written communication skills. |
|---|--|

**ECTS / WORKLOAD TABLE**

| <b>Activities</b>                                    | <b>Number</b> | <b>Duration (Hour)</b>   | <b>Workload (Hour)</b> |
|--|---------------|--------------------------|------------------------|
| Course Hours (Including Exam Week: 16 x Total Hours) | 15            | 3                        | 45                     |
| Laboratory   | -             | -                        | -                      |
| Application  | -             | -                        | -                      |
| Special Course Internship (Work Placement)           | -             | -                        | -                      |
| Field Work   | -             | -                        | -                      |
| Study Hours Out of Class                             | 15            | 2                        | 30                     |
