<b>Course Language</b>	English
<b>Course Type</b>	Required
<b>Course Lecturer</b>	Assist. Prof. Dr. Gülay Ünel
<b>Course Assistant</b>	Büsra Özdenizci
<b>Course Objectives</b>	This course aims to provide basic skills for the design and development of a project as a solution to an information technology problem.
<b>Course Learning Outcomes</b>	Upon successful completion of the course, students will be able to propose, analyse, design, develop, test and maintain an information technology system including software solutions, security model, computer and network infrastructure, information systems etc. to solve information technology problems.
<b>Course Content</b>	Design and development of a project for an Information Technology problem under the supervision of an academic advisor; submission of the results in the form of a project report and oral presentation.

### COURSE'S CONTRIBUTION TO PROGRAM

#	Program Qualifications / Outcomes	* Level of Contribution				
		1	2	3	4	5
1	An ability to use the theoretical and applied foundations in mathematics and basic sciences acquired in the undergraduate level to the solutions of problems in information technology area					X
2	An ability to analyze a graduate level problem, identify and define the computing requirements appropriate to its solution, to understand, select and use appropriate technology, tools, standards, protocols, building blocks, and components to solve the problem					X
3	An ability to propose, analyze, design, develop, test and maintain an information technology system including software solutions, security model, computer and network infrastructure, information systems etc. to solve graduate level information technology problems					X
4	An ability to analyze and communicate local and global impact of computing on individuals, organizations and society; and the ability to apply information technology techniques, skills, and tools for regular computing practices as well as to improve effectiveness of current methodologies					X
5	An ability to effectively communicate in oral and written media with all kinds of related audiences, prepare documentation for this purpose; and acquire academic writing skills in a foreign language					X
6	An ability to understand and teach professional, ethical, legal, and social issues and responsibilities of information technology profession and research					X
7	An ability to gain knowledge and conduct research on topics inside and outside the requirements of the information technology profession, and the ability to lead and work within heterogeneous teams of people from different research areas to accomplish interdisciplinary research					X
8	An ability to engage in life-long learning and professional development for personal improvement to follow contemporary information technology research					X
