IMPERFECTION IN DAILY LIFE / GÜNLÜK YAŞAMDA KUSURLULUK

İKSV İstanbul Design Biennial Academy Program

13 Oct / 15 Nov 2012 - Gallery Işık, Teşvikiye-İstanbul

The project team, which consists of 10-12 members from 2nd, 3rd and 4th-year students studying in the Department of Industrial Design, displays product designs which reveal the relationships among nature-human-product under the title of “Imperfection in Daily Life.”

The students, who interpreted the theme of “Imperfection” with their own analyses, deliver quests such as the conflict of natural-artificial objects by combining different materials; form trials which become more intriguing as they abandon the restrictions of symmetry and uniformity, as well as original works which can be differentiated and transformed into unique products through customization. Apart from the products, the documents which reflect the production process supplement the project.
